Target Role: Senior Technical Support Engineer | Alloy

PROFESSIONAL SUMMARY

High-performing Systems & Technical Support Specialist with proven experience resolving complex Tier 2 / Tier 3 infrastructure, enterprise software, and diagnostic hardware escalations. Deep expertise in log-driven root cause analysis (RCA), SQL Server database diagnostics, Windows OS internals, networking protocols, and system deployment. Averaged 35% reduction in ticket turnaround times through custom PowerShell and Python automation. Positioned to deliver immediate impact for Alloy's Senior Technical Support Engineer role with dependable, high-satisfaction technical support and defect triage.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Systems Scripting & Tooling:** PowerShell, Python, Go, SQL, TypeScript, Node.js, Bash, ServiceNow, Oracle Ticketing, Git, Postman.
- **Imaging & Medical Devices:** Digital Imaging Systems, PACS & DICOM workflows, sensor calibration, medical/dental diagnostic software, peripheral hardware integration (USB/serial/IP devices), driver stack triage (libusbK, WinUSB).
- **Operating Systems & Low-Level Diagnostics:** Windows Server, Windows 10/11, Sysinternals Suite (Process Explorer, Procmon), Windows Event Viewer, Crash Dump Analysis, peripheral enumeration, registry tracing, hardware/software fault isolation.
- **Data Layers & Database Diagnostics:** SQL Server (Runtime Triage, Query Profiling, Execution Log Analysis, index checks, deadlock troubleshooting), REST API Debugging, Payload Validation, Schema Integrity.
- **Networking & Identity / Access:** TCP/IP, DNS, DHCP, VPN configurations, corporate routing fundamentals, Wireshark packet analysis, Active Directory, Azure AD / Entra ID, SSO/SAML, MFA provisioning.
- **Field & Implementation Support:** Customer site escalation management, deployment blueprints, technical runbooks, client onboarding, root cause analysis (RCA) reporting, hardware replacement and firmware diagnostics.

PROFESSIONAL EXPERIENCE

Midmark Corporation | Versailles, OH — *Associate Technical Service Specialist* (Jun 2024 – Sep 2026)

- Engineered custom PowerShell and Python automation scripts to collect diagnostic logs, parse telemetry outputs, and deploy configuration patches, cutting recurring incident resolution times by 35%.
- Managed high-severity Tier 2/Tier 3 technical escalations for clinical and diagnostic imaging software, isolating application crashes, driver conflicts, and OS faults using Sysinternals and Windows Event Viewer.
- Supported healthcare and dental imaging hardware/software ecosystems, troubleshooting digital sensor communication, peripheral connectivity (USB/IP), and DICOM/PACS data flow integrity.
- Conducted root-cause investigations into SQL Server runtime issues, resolving query timeouts, database connectivity drops, and batch data synchronization failures across distributed client-server environments.
- Handled identity and access management incidents across Active Directory and Entra ID (Azure AD), troubleshooting SAML/SSO token handshakes, security groups, and MFA configurations.
- Partnered with software and hardware engineering teams to escalate reproducible bugs with complete crash dumps, network traces, and SQL execution plans to expedite patch releases.
- Authored standardized deployment blueprints, technical runbooks, and internal SOPs to document complex environment workarounds, reducing escalation cycle times across the team.

PROFESSIONAL EXPERIENCE (CONTINUED)

Quality Boat Salvage | Pasadena, CA — *Data & Operations Systems Specialist* (Mar 2023 – Jun 2024)

- Architected automated inventory synchronization pipelines and data-handling scripts in Python, reducing sync cycle times by 20% while eliminating state desynchronization.
- Administered cloud directory accounts, access controls, multi-factor authentication (MFA), and data integrity standards across operational tools and databases.
- Authored operational runbooks, hardware maintenance guides, and system troubleshooting SOPs to standardize staff onboarding and operational technical procedures.

Pyramid Consulting, Inc. | Remote / Los Angeles, CA — *IT Systems Engineer (Contract)* (May 2022 – Nov 2022)

- Delivered enterprise L2/L3 systems support for distributed Windows and macOS endpoints, corporate VPNs, and AWS identity/access configurations.
- Triaged web application performance degradation, REST API failures, and runtime defects utilizing browser developer tools, HTTP request inspection, and server-side log output.
- Maintained a 95%+ first-contact satisfaction rating handling escalated technical tickets within enterprise ServiceNow environments.

TECHNICAL PROJECTS & SYSTEMS ENGINEERING

- **Portsy – Distributed File Synchronization & State Engine** (*Go, Wails, TypeScript, Firestore*): Architected lightweight desktop background synchronization utility in Go utilizing low-level OS file-system event listeners; engineered conflict-resolution algorithms for concurrent writes, file locks, and offline resilience.
- **EcoCommerce – Scalable Relational Data Platform & API Service** (*Node.js, TypeScript, React, Prisma, SQL*): Designed full-stack data platform with strictly typed relational schemas, query optimization, robust REST APIs, DNS management, and uptime monitoring.

EDUCATION & CERTIFICATIONS

Coursework in Computer Science (2 Years Completed) — Glendale Community College, Glendale, CA

Certificate in Digital Systems & Audio Engineering — Icon Collective, Los Angeles, CA
