Target Role: Lead Security Systems Solutions Engineer | Bogaard Group International

PROFESSIONAL SUMMARY

High-performing Technical & Application Support Specialist with proven experience resolving complex Tier 2 / Tier 3 software, database, and enterprise platform escalations. Deep expertise in log-driven root cause analysis (RCA) using Windows Event Viewer, Procmon, CBS logs, and SQL Server logs to isolate bugs, verify data integrity, and escalate reproducible defects to engineering teams. Averaged 35% reduction in ticket turnaround times through custom PowerShell and Python automation. Positioned to deliver immediate impact for Bogaard Group International's Lead Security Systems Solutions Engineer role.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Engineering Escalation & Support Operations:** Tier 2 / Tier 3 Defect Triage, Engineering & QA Bug Escalation, Technical Runbooks, SOP Authoring, Client Onboarding, ServiceNow, Jira, Oracle Ticketing.
- **Root-Cause Analysis & Log Diagnostics:** Windows Event Viewer, Sysinternals Suite (Procmon, Process Explorer), CBS Logs (Component-Based Servicing / installer & update diagnostics), Application & Crash Dump Analysis, Registry & File-System Tracing, Bug Reproduction.
- **Database & Data Integrity Troubleshooting:** SQL Server (SQL Error Logs, Runtime Triage, Query Profiling, Execution Log Analysis, Deadlock & Timeout Troubleshooting), Relational Database Querying, Batch Data Synchronization, Schema Integrity.
- **APIs, Integrations & Technical Stack:** REST APIs, JSON Payload Validation, Postman, Webhooks, Client-Server Architecture, DICOM/PACS Data Flow, TCP/IP, DNS, DHCP, VPNs.
- **Scripting & Development:** PowerShell, Python, SQL, Go, TypeScript, Node.js, Bash, Git.

PROFESSIONAL EXPERIENCE

Midmark Corporation | Versailles, OH — *Associate Technical Service Specialist* (Jun 2024 – Sep 2026)

- Partnered directly with software engineering and QA teams to escalate verified Tier 2/Tier 3 bugs with complete reproduction steps, Event Viewer/CBS log bundles, Procmon traces, and SQL execution logs to expedite patch releases.
- Managed high-severity Tier 2/Tier 3 software escalations for clinical and enterprise imaging applications, isolating complex application crashes, installer failures, and OS-level faults using Windows Event Viewer, Procmon, and CBS logs.
- Conducted deep root-cause investigations into SQL Server runtime issues, analyzing SQL logs to resolve query timeouts, database connectivity drops, and data integrity/synchronization failures across client-server environments.
- Traced file-system mutations, registry keys, and background process activity with Sysinternals Procmon to reproduce elusive software defects and configuration conflicts.
- Engineered custom PowerShell and Python automation scripts to collect diagnostic logs, parse telemetry outputs, and deploy configuration fixes, cutting recurring incident resolution times by 35%.
- Troubleshot application data workflows and DICOM/PACS integration pipelines, ensuring reliable data transmission and schema integrity across connected software platforms.
- Authored standardized technical runbooks and internal SOPs documenting complex log-triage workflows and workarounds, reducing escalation cycle times across the support organization.

PROFESSIONAL EXPERIENCE (CONTINUED)

Quality Boat Salvage | Pasadena, CA — *Data & Operations Systems Specialist* (Mar 2023 – Jun 2024)

- Architected automated inventory synchronization pipelines and data-handling scripts in Python, reducing sync cycle times by 20% while eliminating state desynchronization.
- Administered cloud directory accounts, access controls, multi-factor authentication (MFA), and data integrity standards across operational tools and databases.
- Authored operational runbooks, hardware maintenance guides, and system troubleshooting SOPs to standardize staff onboarding and operational technical procedures.

Pyramid Consulting, Inc. | Remote / Los Angeles, CA — *IT Systems Engineer (Contract)* (May 2022 – Nov 2022)

- Delivered enterprise L2/L3 systems support for distributed Windows and macOS endpoints, corporate VPNs, and AWS identity/access configurations.
- Triaged web application performance degradation, REST API failures, and runtime defects utilizing browser developer tools, HTTP request inspection, and server-side log output.
- Maintained a 95%+ first-contact satisfaction rating handling escalated technical tickets within enterprise ServiceNow environments.

TECHNICAL PROJECTS & SYSTEMS ENGINEERING

- **Portsy – Distributed File Synchronization & State Engine** (*Go, Wails, TypeScript, Firestore*): Architected lightweight desktop background synchronization utility in Go utilizing low-level OS file-system event listeners; engineered conflict-resolution algorithms for concurrent writes, file locks, and offline resilience.
- **EcoCommerce – Scalable Relational Data Platform & API Service** (*Node.js, TypeScript, React, Prisma, SQL*): Designed full-stack data platform with strictly typed relational schemas, query optimization, robust REST APIs, DNS management, and uptime monitoring.

EDUCATION & CERTIFICATIONS

Coursework in Computer Science (2 Years Completed) — Glendale Community College, Glendale, CA

Certificate in Digital Systems & Audio Engineering — Icon Collective, Los Angeles, CA
